

HOSSEIN GERAMI

Solution Engineer | SaaS Integrations, Cloud Systems & React Native

 hosseingerami.com

I'm a Solution Engineer and software developer with 9+ years of experience building mobile applications, SaaS integrations, and scalable cloud-based systems. While my background started in React Native and Expo mobile development, over the last two years I've focused heavily on designing and delivering complex integrations between business platforms, CRMs, financial systems, and customer workflows. In my current role at an Australian fintech startup, I lead integration and solution delivery projects connecting systems such as Microsoft Dynamics, Xero, MYOB, Sage, and HubSpot using Azure Logic Apps, Azure Functions, Node.js, TypeScript, and AWS infrastructure. My work sits at the intersection of engineering, customer success, and solution architecture — helping customers onboard faster, automate operational workflows, and scale reliably through secure real-time data integrations. I enjoy translating business problems into practical technical solutions while still staying hands-on with product engineering and mobile technologies.

EXPERIENCE

Solution Engineer | Integrations & Customer Solutions quickclaim - Fulltime

 June 2024 – Present  Sydney, Australia

- Led integration and solution delivery initiatives between quickclaim and external systems including Microsoft Dynamics, HubSpot, Xero, MYOB, Sage, and other enterprise financial platforms.
- Designed and maintained scalable integration workflows using Azure Logic Apps, REST APIs, Node.js, TypeScript, and cloud infrastructure.
- Built and deployed Azure Functions to support custom business logic, event-driven processing, and automated integration workflows.
- Developed secure real-time synchronization systems for customer, invoice, payment, and claim data across multiple third-party platforms.
- Worked directly with enterprise customers to understand operational requirements, troubleshoot integration challenges, and deliver tailored technical solutions.
- Acted as a bridge between engineering, operations, and customers to improve onboarding experience and accelerate integration delivery timelines.
- Contributed to backend architecture and system design decisions focused on scalability, reliability, and maintainability.
- Implemented monitoring and debugging strategies to improve integration reliability and reduce operational issues.

Senior Mobile Engineer quickclaim - Fulltime

 June 2022 – June 2024  Sydney, Australia

- Developed and maintained QC-card and QC-pay React Native applications for iOS and Android, supporting 4.4+ million Australians with disabilities.
- Built and enhanced features using React Native, Expo, TypeScript, and React ecosystem tooling.
- Maintained and improved quickclaim's React-based web platform supporting accessible financial services workflows.
- Worked on backend APIs and cloud services using Node.js, TypeScript, and AWS.
- Implemented automated testing strategies to improve application reliability and maintainability.
- Collaborated closely with product, support, and engineering teams in an agile startup environment.

MOST PROUD OF

-  **Systems Thinking**
Able to understand complex business workflows and design scalable technical solutions.
-  **Customer-Focused**
Strong ability to work directly with customers and translate business needs into engineering outcomes.
-  **Ownership**
Comfortable leading integrations end-to-end from discovery and architecture to delivery and support.
-  **Problem Solving**
Creative and practical approach to solving technical and operational challenges.

SKILLS

Solution Engineering & Integrations

- Solution Engineering
- System Integrations
- Azure Logic Apps
- Azure Functions
- REST APIs
- Technical Discovery
- Customer Solutions
- Solution Architecture
- Workflow Automation
- SaaS Platforms

Cloud & Backend

- Node.js
- TypeScript
- AWS
- Azure
- Express.js
- Authentication
- Testing
- Scalable Systems

Frontend & Mobile

Senior Front-End Developer (React | Node.js)

LERNE24 - Contract

📅 Apr 2021 – May 2022

📍 Remote

- Developed the Lerne24 hybrid mobile application, an education management platform built with Ionic and React, supporting four languages for learning.
- Used TypeScript as the main programming language to ensure scalable and maintainable code.
- Built custom plugins, including interactive features like an Instagram-style story component using React.
- Utilized Feathers.js to build lightweight real-time backend services for efficient app-server communication.
- Authored technical documentation covering architecture, implementation, and onboarding processes.
- Configured Firebase services for Android and iOS push notifications.
- Worked within the Atlassian ecosystem using Jira, Bitbucket, Confluence, and Backlog.

React and React Native Developer

SmartHoom (Start-up Co)

📅 May 2020 – March 2021

📍 Iran

- Developed the Gardenia IoT mobile application for Android and iOS using React Native.
- Implemented GraphQL for structured and efficient API communication.
- Built functionality to communicate with IoT devices using WiFi, Bluetooth, and UDP protocols.
- Developed custom Bluetooth communication layers using React Native BLE libraries.
- Worked closely with microprocessors and hardware-level integrations.
- Created and optimized WordPress websites with SEO-focused improvements.
- Used Jira for project tracking and agile workflow management.

React Native Software Developer

Tahsilgaran Roshd Navabegh Javan Co

📅 August 2019 – May 2020

📍 Iran

- Developed a multilingual education management mobile application using React Native.
- Used TypeScript to improve maintainability and scalability.
- Built reusable custom UI components and plugins.
- Created project documentation covering architecture and implementation workflows.
- Configured Firebase push notifications for Android and iOS applications.
- Worked with Jira, Bitbucket, and Confluence for agile collaboration.

Front-End Software Developer

Mir Alavi IT Training Institute

📅 January 2019 – August 2019

📍 Iran

- Developed the Aloostad mobile application using React Native.
- Built educational web applications using Angular.
- Contributed to backend services using ASP.NET Core 2.
- Developed teacher dashboard panels using Angular.

EDUCATION

Bachelor's Degree (Software Engineering)

Azad University (IAU)

📅 2014 – 2018

LANGUAGES

English

Persian

German

Software Developer - Mobile

Hihab

📅 March 2018 – December 2018 📍 Iran

- Developed a habit tracker mobile application using React Native.
 - Built a custom high-performance pie chart using react-native-svg.
 - Worked with React Hooks and modern React architecture.
 - Collaborated using Git and agile methodologies.
 - Integrated GraphQL APIs into the application.
-

Software Developer - Web

Sepidan

📅 January 2016 – December 2017 📍 Iran

- Converted UI/UX Adobe PSD designs into responsive HTML, CSS, Bootstrap, and jQuery interfaces.
- Developed CMS-based websites using WordPress, Drupal, and Magento.

A DAY OF MY LIFE
